

SHOWER CONTROL - ELECTRONIC

| Description | Operating Criteria | Model | |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------|-------------------------------------------------------------------------------------|
| <p>Mono - control system with hygienic 'No Touch' sensor and solenoid valve for areas where hygiene + ease of use is a priority Adjustable time settings from 3 to 75 seconds. Sensor chromium plated durable engineering plastic with shatterproof plastic sensing window.</p> <p>Supplied with 230/240vAC 12vAC1a Transformer C.E Approved.</p> | <p>84mm Ø 22mm projection Power consumption: 6AV Pressure range 0.15-10 bar. Ambient Temperature range 5-40 °C Require 12vAC +10% 50/60Hz</p> | <p>MC 120</p> |  |
| <p>Wall mounted Sensor with solenoid valve And adjustable timing module. Supplied with 230/240vAC 12vAC1a transformer. For showering and handwashing Shatter proof sensor.</p> | <p>84mm Ø 12mm projection As Above</p> | <p>MC 129</p> |  |
